

Informe orquestador — Azul + RC → preset Mooer único

Generado: 2026-07-30 23:20 UTC

Idea clave: NO son dos EQs aparte.

Cada preset Mooer emula la MEZCLA:

$$\text{target} = \text{Azul}(\text{central}) + \text{gain_Azul} + \text{RC}(\text{setup})$$

Así el RC 'nuevo' ya lleva el Azul (y su ganancia) adentro.

Orden del informe:

- 1) Transferencia Café → Azul (curvas + gain)
- 2) Respuestas RC Bajo / Híbrido / Guitarra
- 2b) Mezcla Azul(+gain)+RC = target compuesto
- 3) Tres presets Mooer GE300 de mínimo error sobre esa mezcla

Constraints GE300 (hard):
